QUARTERLY REPORT 31 MARCH 2005

SOUTH AFRICAN OPERATIONS

Chromite Tailings Retreatment Project (“CTRP”) (formerly “RK1”)

Highlights

- **Commissioning completed and production commenced 13 January 2005**
- **First concentrate produced on 21 January 2005**
- **Production of 644 PGM ounces (Sylvania attributable 161 PGM ounces)**
- **Commissioning issues all in hand**

Sylvania Resources Limited (“Sylvania”) owns a 25% interest in a Consortium led by Aquarius Platinum Limited. During the quarter, the consortium changed its name from the RK1 project to the “Chrome Tailings Retreatment Project” (“CTRP”). The Consortium treats chromite tailings through a purpose built plant adjacent to Aquarius Platinum Limiteds’ Kroondal Mine, in order to extract platinum group metals (platinum, palladium, rhodium and gold).

The plant was commissioned during December 2004, and first production commenced on 13 January 2005. The first concentrate from the plant was shipped on 21 January 2005.

Since commissioning the consortium has been carefully ramping up the production profile of the operation and by the end of the quarter all commissioning issues were considered to be in hand.

The initial year of the project is expected to yield in excess of 20,000 ounces of Platinum group metals (“PGMs”), growing to 28,000 ounces per year from the second year, with 25% of the production attributable to Sylvania.

The project economics for the RK1 project, are very robust over a wide range of metal price and exchange rate assumptions. Conservative modeling gave an after-tax internal rate of return of 72% at basket price of US\$521 per PGM ounce with an exchange rate of R7/US\$1. The current PGM basket price for RK1 material sits at around US\$740 per ounce which is a significant premium to the preferred price used in the model and more than compensates for the current strength of the Rand.

Please refer to the Sylvania Resources Limited website at www.sylvaniaresources.com for photographs providing regular updates on the progress of the construction.

QUARTERLY REPORT 31 MARCH 2005

CORPORATE

During the quarter, Mr Michael Langoulant was appointed as Company Secretary of the company.

AUSTRALIAN OPERATIONS

Previous exploration by Sylvania within Australia has been focused on the Archean Sylvania Inlier, situated in Western Australia. Within this area the Company still retains mineral exploration projects known as Copper Knob and Jimblebar. The projects lie east and south of Newman and are located within the Peak Hill Mineral Field. Exploration on these tenements has targeted gold, copper-zinc, nickel and platinum group element mineralization.

Sylvania has previously entered into an Option Agreement with Warwick John Flint ("Flint") over all of the Australian tenements of Sylvania at Jimblebar and Copper Knob. Under the terms of the Option Agreement Flint has the right to exercise the Option at any time up until 16 August 2005, to acquire Sylvania's interests in its Australian tenements for the consideration of A\$55,000, and the issuance to Sylvania of fully paid ordinary shares in a listed entity to the value of A\$200,000. Flint has the obligation to maintain the tenements in good standing during the life of the Option Agreement. Flint has the right to extend the Option Agreement for a further 12 month period, until 16 August 2006 through the payment of A\$10,000 and the share consideration increasing to A\$300,000.

Sylvania entering into this Option Agreement was consistent with the Board's stated intention of focusing its attention on the activities of the RK1 Consortium, and other opportunities in Southern Africa.

1. JIMBLEBAR COPPER/GOLD (45 kms east south east of Newman; Sylvania 80% P52/869 & MLA52/739, Sylvania 100% others)

The Jimblebar tenements lie immediately south east of the currently operating Jimblebar iron ore mine. Sylvania's interests now relate to two prospecting licences, with one of the latter associated with a mining lease application, covering an area of approximately 200 hectares.

The main area of interest for copper in the Jimblebar tenements is a prospective sequence of metamorphosed felsic and intermediate volcanics containing magnetite outcrops as well as several occurrences of outcropping secondary copper mineralization.

QUARTERLY REPORT 31 MARCH 2005

No field work was undertaken by the Company during the quarter.

2. COPPER KNOB (42 kms east south east of Newman; Sylvania 100%)

The Mining Lease 52/211 at Copper Knob, covers a very large body of disseminated low grade sulphide copper mineralization with some gold values that has been drilled by previous explorers. This mineralization lies within a sequence of felsic and intermediate volcanic rocks that extend for over 9 kilometres forming the Jimlebar copper area. The Copper Knob mining lease has untested potential for an oxide copper resource and for discrete massive copper bearing sulphide bodies.

No field work was undertaken by the Company during the quarter.

Notes

-
- 1 This quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
 - 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
 - 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
 - 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
 - 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
