

## QUARTERLY REPORT 30 JUNE 2003

---

### OPERATIONS

Exploration by Sylvania Resources Ltd within Australia has been focused on the Archean Sylvania Inlier, situated in Western Australia. Within this area the Company still retained mineral exploration projects known as Copper Knob and Jimblebar. The projects lie east and south of Newman and are located within the Peak Hill Mineral Field. Exploration on these tenements has targeted gold, copper-zinc, nickel and platinum group element mineralization.

**1. JIMBLEBAR COPPER/GOLD** (45 kms east south east of Newman; Sylvania 80% P52/869 & MLA52/739, Sylvania 100% others)

The Jimblebar tenements lie immediately south east of the currently operating Jimblebar iron ore mine. Sylvania's interests now relate to two prospecting licences, with one of the latter associated with a mining lease application, covering an area of approximately 200 hectares.

The main area of interest for copper in the Jimblebar tenements is a prospective sequence of metamorphosed felsic and intermediate volcanics containing magnetite outcrops as well as several occurrences of outcropping secondary copper mineralization.

An existing exploration licence was surrendered (EL52/1328) and three mining lease applications (MLA 52/783, 52/792 & 52/793) were withdrawn during the quarter.

No field work was undertaken during the quarter.

**2. COPPER KNOB** (42 kms east south east of Newman; Sylvania 100%)

The Mining Lease 52/211 at Copper Knob, covers a very large body of disseminated low grade sulphide copper mineralization with some gold values that has been drilled by previous explorers. This mineralization lies within a sequence of felsic and intermediate volcanic rocks that extend for over 9 kilometres forming the Jimblebar copper area. The Copper Knob mining lease has untested potential for an oxide copper resource and for discrete massive copper bearing sulphide bodies.

No field work was undertaken during the quarter.

**3. WOGGAGINNA HILL** (50 kms south east of Newman; Sylvania 100%)

The Woggaginna Hill project, located 50 kilometres south east of Newman, had consisted of one exploration licence, which expired at the end of the quarter (EL52/1332). The project had covered a portion of the deeply weathered and poorly outcropping Woggaginna Greenstone Belt, which is situated in the southern part of the Sylvania Inlier. This greenstone belt is composed of banded iron formation and mafic and ultramafic intrusive rocks which have been intruded by granitoid rocks prior to intense deformation.

## Notes

- 
- 1 This quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
  - 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
  - 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
  - 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
  - 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
