

7 September 2007

Sylvania Resources Limited ('Sylvania' or the 'Company')

Admission to S&P/ASX Indices

The Directors of Sylvania Resources Limited ('Sylvania' or the 'Company') are pleased to announce that the Company has today been admitted to the S&P/ASX All Ordinaries and S&P/ASX 300 indices.

The S&P/ASX All Ordinaries index is Australia's premier market indicator. It represents the 500 largest companies in the Australian equities market. Index constituents are drawn from eligible companies listed on the Australian Stock Exchange.

The S&P/ASX 300 index provides additional depth and coverage in the Australian equities market. Index constituents are drawn from eligible companies listed on the Australian Stock Exchange. This index is designed to address investment managers' needs to benchmark against a portfolio characterized by sufficient size and liquidity. S&P/ASX 300 is a component of the Australian indices that could be used as building blocks for portfolio construction.

The admission of the Company to these two important indices reflects the Company's establishment as a producing entity, as it concentrates on developing its chromite washing plants ("CWP's") and PGM recovery plants ("PRP's") in South Africa. Commercial production from the Company's Millsell CWP and PRP commenced on 10 June 2007 and the recently-commissioned integrated CWP and PRP facility at Steelpoort is currently being ramped-up to design capacity.

The Company's 2007 Annual Report is currently available on the Sylvania website (www.sylvaniamresources.com) and is expected to be posted to shareholders, along with the notice convening an Annual General Meeting of shareholders, on or about 26 September 2007.
