SOUTH AFRICAN OPERATIONS

Chromite Tailings Retreatment Project (“CTRP”) (formerly “RK1”)

- PGM production of 1,484 ounces (Sylvania attributable 371 PGM ounces)
- Significant operational improvement as recoveries increase to 51% from 27% in the previous quarter
- Improvement in unit costs, 42% lower than previous quarter at R2000 per PGM ounce
- Gross cash margin improves to 65% from 43% in the previous quarter

During the quarter only current arisings from the Kroondal Chrome mine were fed to the CTRP. The feed of dump material from the Bayer Chrome Mine was stopped due to poor recoveries achieved in the previous quarter. The effect was that recoveries rose to 51% against 27% in the previous quarter. Consequently, unit costs decreased by 42% to R2000 per PGM ounce from R3,441 per PGM ounce in the previous quarter.

QUARTERLY REPORT 31 MARCH 2006

Following the results of the initial Mintek testwork, a small expansion project is planned to increase throughput and production. This expansion will add dump material from the Kroondal Chrome Mine to the CTRP feed.
